GEDDES CAM OUTLINE PROPOSAL

Dear «Title» «FirstName» «LastName»,

We write to inform you of the above proposal and invite your participation. It is hoped that all who are mentioned in the Circulation List (inside) and others yet to be included will wish to contribute in some way, or ways.

We seek participation in the following areas: Content Provision to interpret what our proposal seeks to show; Permissions, to allow us to install equipment and at this stage, expressions of interest in participation. This Outline Proposal also hopes to elicit any possible objections to what is proposed and to take on useful suggestions.

All organisations approached (whether specific permission is required from them for some part of the scheme or not) are invited to provide supporting content to the proposed camera installation to make the Project useful and worthwhile.

Part of the point of this document is to gauge interest - technical and financial papers will follow. They may be influenced by what response the Ballater Geddes Project 2004 receives to this approach.

Organisations may wish to consider how this Project may impact on their World Wide Web strategy, how they would make best use of the outputs from the proposed installation and how they would like to influence the Project. We wish to ensure a useful and successful outcome for organisations and the Project.

Contact details are included within the document and we would ask people/organisations not to hesitate to contact us if they require any further discussion. As the title of our organisation suggests we have a deadline of 2004 or thereabouts, and your earliest consideration and response would be appreciated in order to allow project planning to proceed within this timescale.

Best wishes

Sheila Potter, Convener, Ballater Geddes Project 2004

"This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests" - Patrick Geddes
