

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”

## Geddes The Teacher

Patrick Geddes used the Outlook Tower and its' Camera Obscura near Edinburgh Castle to teach about the region and wider World.

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”

## Geddes The Planner

Patrick Geddes was deeply involved in planning both in Scotland and Internationally. He wanted development on a human scale with maximum benefit to mind and body.

Part of Ramsay Gardens, Castle Hill, Edinburgh

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”

## Geddes The Philosopher

Geddes used the “Tree of Life” to “portray...the temporal and spiritual aspects of human history with the streams of power and culture caught and defined...”

(Philip Boardman).

The symbols on left and right represent various ages, the tree, bud and lions with human faces look up from origins to the future.

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”

## Geddes The Ecologist The Valley Section

Geddes used the Valley Section to explore the relationships between sectors of society, and, the environment.

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”

**Patrick Geddes**

## Geddes The Patron of the Arts

“The Evergreen” gave a platform for Scottish artists and writers.

## Geddes The Thinker

Patrick Geddes used "Thinking Machines", simple and complex, to identify the relationships between aspects of place, work and folk and the interconnectedness of all strands of life.

A Geddesian Thinking Machine simplifying and showing basic factors of human existence.

“This is a green world, with animals comparatively few and small, and all dependent on the leaves. By leaves we live. Some people have strange ideas that they live by money. They think energy is generated by the circulation of coins. Whereas the world is mainly a vast leaf colony, growing on and forming a leafy soil, not a mere mineral mass: and we live not by the jingling of our coins, but by the fullness of our harvests.”
